

3.1 Classrooms

Smart Classrooms

The five smart classrooms in Block B are equipped with state-of-the-art ICT-enabled facilities designed to enhance the teaching and learning experience. These include:

- **Interactive Whiteboards:** Allowing for interactive lessons where students can engage directly with content, making learning more dynamic and participatory.
- **High-Definition Projectors and Audio Systems:** Ensuring clear visual and auditory communication, crucial for both large lectures and more intimate class settings.
- **Wi-Fi Connectivity:** High-speed internet access facilitates the use of online resources, digital tools, and real-time collaboration.

- **Student Response Systems:** These tools enable instant feedback, quizzes, and other interactive activities, promoting active learning and engagement.

Regular Classrooms

In addition to the smart classrooms, Block B contains eight regular classrooms that are well-equipped to support traditional teaching methods:

- **Comfortable Seating:** Ergonomically designed seating ensures that students remain comfortable and focused during long hours of study.
- **Well-Lit and Ventilated Spaces:** All classrooms are designed to provide a comfortable and conducive learning environment.
