proved to be a meaningful initiative that not only enhanced students’ practical skills but also inspired them to adopt **environmen**...
lives, reinforcing the institution’s commitment to sustainability and holistic education.

GAT-B MOCK TEST

GAT-B mock test was conducted by JUIT Wagnaghat in association with Life sciences departments of RKMV under the MoU activity on 14/02/2025, at RKMV Shimla

The Graduate Aptitude Test in Biotechnology (GAT-B) is an important examination for candidates aspiring to pursue postgraduate programs in biotechnology and related fields across various institutions in India.

The primary objective of conducting the **GAT-B** mock test was to help candidates familiarize themselves with the test format, time management, and the types of questions that are typically asked.

Prof. Hemant Sood from **JUIT Wagnaghat** conducted a career counseling session in which she motivated the students by giving her own life experiences. She said that one should never give up and always try to do something new. Prof. Sood made the students aware about different **career opportunities in the field of Biotechnology & Bioinformatics**. Through a power point presentation she also informed the students about the opportunities available at JUIT Wagnaghat.

GAT-B Mock test was held offline with a paper-based format with a clear marking scheme and sufficient number of test invigilators to maintain an orderly environment.

Students were clearly informed about the test structure, rules, and time limits. The GAT-B mock test consisted of two sections: Section A had 20 MCQs of 10+2 level and Section B had 40 MCQs of graduate level with negative marking to give candidates a real-time experience.

The actual GAT-B has a fixed duration of 3 hours, but this mock test was of one hour duration.

Total 99 students appeared in this mock test. Of these 99 students, 57 were from Life sciences and 42 were from Microbiology and Biotechnology department of RKMV Shimla.

Through this mock test the students gained familiarity with the actual GAT-B exam format and structure, reducing exam anxiety, they learnt how to effectively manage their time during the actual exam.

Department of Geography
Report on Guest Lecture Series for Postgraduate Students

Introduction

In an effort to broaden the academic and practical understanding of postgraduate students, the Department of Geography organized a **Guest Lecture Series** during February, March and April 2025. The lectures were designed to provide interdisciplinary exposure and professional insights relevant to the evolving landscape of geographical studies.

Objectives

- To expose students to current trends and applications in geography and related fields.
- To introduce emerging tools, technologies, and issues through expert perspectives.
- To bridge the gap between academic learning and real-world practices.

Details of Guest Lectures

Lecture 1: Artificial Intelligence and Its Impact on Geography

- **Date:** February 18, 2025
- **Speaker:** Dr. Khayal Chand, Assistant Professor, Centre of Excellence, Sanjauli
- **Key Points Covered:**
 - Role of AI in spatial data analysis and predictive modeling
 - Applications of machine learning in climatology and urban planning
 - Ethical implications and challenges of using AI in geographical research
- **Outcome:** Students gained insight into how AI tools are reshaping modern geographic analysis.

Lecture 2: Climate Change and Its Impact on Forests

- **Date:** February 22, 2025
- **Speaker:** Shri Dinesh Paul, Divisional Forest Officer (DFO), Shimla Headquarters
- **Key Points Covered:**
 - Real-world observations of climate change in the Himalayan region

- Effects of rising temperatures, erratic rainfall, and forest degradation
- Forest policy, conservation efforts, and community participation
- **Outcome:** Students appreciated the direct field experience shared and learned about practical challenges in environmental management.

Lecture 3: Hands-On Practice on QGIS – Digital Image Processing

- **Date:** April 3, 2025
- **Speaker:** Dr. Ajay Chanjta, GIS Expert and Researcher, PDF (ICSSR), HPU
- **Key Points Covered:**
 - Introduction to QGIS interface and tools
 - Supervised and unsupervised image classification
 - Practical session on satellite imagery and map generation
- **Outcome:** Students were able to gain hands-on training on open-source GIS tools, enhancing their technical skills for future research and job readiness.

Student Engagement and Feedback

- **Total Number of PG Students Participated:** 19
- **Feedback Summary:**
 - Students found the series to be highly informative and career-oriented.
 - Many expressed interest in further training on GIS and AI applications.
 - The interactive and practical components of the lectures were especially appreciated.

Conclusion

The Guest Lecture Series successfully enriched the academic experience of postgraduate students, bridging theoretical learning with modern applications and field practices. The Department of Geography is committed to organizing similar events in the future and thanks all the esteemed speakers for their valuable contributions.
